Appendix 4 – Forms

Appendix 5 – Templates

1.0 Introduction

This policy has been developed for our Academy schools to ensure pupils/students are fully supported with medical conditions. It has been developed in line with the Department for Education statutory guidance on Supporting Pupils with Medical Conditions (2014) For Governing Bodies of Maintained Schools and Proprietors of Academies in England December 2015

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/484418/supporting-pupils-at-school-with-medical-conditions.pdf

This policy has not been developed by a specific medical professional or organisation / body.

2.0 Medication Policy Statement

Section 100 of the Children and Families Act 2014 places a duty on proprietors of academies to make arrangements for supporting pupils at their school with medical conditions.

The aim of this policy is to ensure that the Academy carries out their statutory duty to make arrangements to support pupils at school with medical conditions.

The Academy will

- ensure that the arrangements detailed within this policy are implemented effectively, this is the responsibility of the Headteacher, who has overall responsibility for policy implementation
- administer prescribed, and non-prescribed medications, to support a pupil's continuous attendance at school, when written consent has been provided by a parent/carer (see Template).
- have clear roles and responsibilities to be able to support pupils so that they have full access to education, including school trips and physical education.
- ensure full co-operation with all relevant parties; healthcare professions, local authority and clinical commissioning groups (CCGs) as required
- provide support and training to enable staff to support pupils with medical conditions
- ensure that clear arrangements are in place to manage the administration and storage of all medicines on the premises
- ensure that the appropriate level of insurance is in place to appropriately reflect the level of risk
- ensure that written records are kept of all medicines administered to pupils
- ensure that emergency procedures are in place and shared with all staff
- ensure that all staff are aware of what practice is not acceptable
- ensure that a complaints procedure is in place regarding the support provided to a pupil with a medical condition

3.0 Medication Management Procedures

The following sections in the Management Procedures outline how the Academy will ensure that the Medication Policy Statement is implemented.

Further reference documentation and guidance is detailed at the end of the policy.

3.1 Roles and Responsibilities

3.1.1 The Trust must

- support schools to ensure that this policy is implemented.
- support schools to ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life.
- support schools to ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions.
- support school to ensure that any members of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.
- make sure that school staff are appropriately insured, and are aware that they are insured to support pupils in this way.

3.1.2 Headteacher

- should ensure that the school's policy is developed and effectively implemented with all partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation.
- should ensure that all relevant staff are aware of the pupil's conditions.
- should ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations.
- should be aware that they have overall responsibility for the development of individual healthcare plans
- should contact the school nursing service in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

3.1.3 School Staff

- should be aware that they may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be directed to do so unless it is within the staff member's contract.
- should take into account the needs of pupils with medical conditions that they teach, although administering medicines is not part of teachers' professional duties.
- should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions
- should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help

3.1.4 School Nurse

- should be aware of their responsibilities for notifying the school when a pupil has been identified as having a medical condition which will require support in school
- can support staff on implementing a pupil's individual healthcare plan and provide advice and liaison, for example, on training
- can liaise with lead clinicians locally on appropriate support for the pupil and associated staff training needs

3.1.5 Other healthcare professionals (including GP, paediatricians, nurse specialists/ community paediatric nurses)

- should notify the school nurse and work jointly when a pupil has been identified as having a medical condition that will require support at school.
- may provide advice on developing healthcare plans
- specialist local health teams may be able to provide support in schools for pupils with particular conditions (e.g. asthma, diabetes, epilepsy)
- should ensure any prescribed medications, including dosages, are appropriately monitored and reviewed.

3.1.6 Pupils

- should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan

3.1.7 Parents/Carers

- should provide the school with sufficient and up to date information about their child's medical needs
- should be involved in the development and review of their child's individual healthcare plan
- should carry out any action they have agreed to as part of its implementation (e.g. provide medicines and equipment and ensure that they or another nominated adult are contactable at all times)

3.2 Training / Qualifications for Supporting Pupils with a Medical Condition

Specific support and training needs will be identified through the Individual Health Care Plans (IHCP), together with who will provide the training. This will enable staff who support a pupil with a medical condition to understand the specific conditions, their implications, preventative and emergency procedures.

The Academy will ensure that adequate first aid cover is available at all times. The first aider role is key in emergency procedures – see section 3.5. However, a first aid certificate does not constitute appropriate training in the general day to day support of a pupil with a medical condition.

Training on administering medications/injections for specific medical conditions at the Academy will be carried out by a trained medical practitioner.

Named staff will be responsible for administering a pupil's medication. When a controlled drug has been prescribed for a pupil's medical condition, at least two members of staff should be trained on how to manage this medication.

Arrangements should be in place to cover staff absence, or staff turnover, so that someone is always available.

All training should be documented on Department for Education's Template, together with a clear plan for refresher sessions, or updates if the pupil's condition changes.

The Academy will ensure that whole school awareness training will take place annually. This should include the contents of this policy, and awareness of common conditions such as asthma allergies, epilepsy and diabetes. This training will be carried out by a first aid trained member of staff.

It is recognised that it is not a requirement to have specific training to administer non-prescribed medications such as pain relief or antihistamines.

The information about where the medicine box is kept is specified on a poster just outside the Admin office and all staff who work in this area should be aware of:-

- what medication is in the box
- who it belongs to and a copy of the parental consent – see Template
- the dose and frequency of administration to the pupils concerned
- who will administer this medication

3.3 Managing Medicines on School Premises

3.3.1 Liability and Indemnity

The Academy will ensure that a level of insurance is in place that appropriately reflects the level of risk for managing medication on the premises. The Department for Education's guidance for "Supporting Pupils at School with Medical Conditions 2015" refers to the appropriate level of insurance being in place.

The insurance arrangements will cover staff providing support to pupils with medication conditions. Insurance policies should be accessible to staff providing such support.

The level and ambit of insurance cover required must be ascertained directly from the insurers. Any requirements of the insurance, such as the need for staff training, should be complied with. Insurers should be updated when a pupil is newly diagnosed, if a pupil's condition changes resulting in extra support needs, or if a pupil with a medical condition leaves the Academy.

3.3.2 Individual Health Care Plan (IHCP)

An Individual Healthcare Plan – see Department for Education's Template (in appendices) - will be used to record the support of an individual pupil for their medical condition. The IHCP is developed with the pupil (where appropriate), parent/carer, designed named member of school staff, specialist nurse (where appropriate) and relevant healthcare services. Appendix 1 is a Department for Education model flowchart for a IHCP.

Where a child has SEN but does not have a statement of EHC plan, their special educational needs are mentioned in an IHCP.

The IHCP will cover the following:-

- the medical condition, its triggers, signs, symptoms and treatments
- the pupil's resulting needs, including medication (dose, whether it is a controlled drug, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and any environmental issues (crowded corridors, travel time between lessons)
- specific support for the pupil's educational, social and emotional needs – for example how absences will be managed, requirements for extra time to complete exams, rest periods or additional support in catching up with lessons
- the level of support needed, including emergencies. If a pupil is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring
- who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional; and cover arrangements for when they are unavailable
- who in the school needs to be aware of the pupil's condition and the support required
- arrangements for written permission from parents and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours
- where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the pupil's conditions
- emergency plans, including whom to contact and contingency arrangements.

The Academy will keep a centralised register of IHCPs, and identify a member of staff to have responsibility for this register.

IHCPs will be reviewed regularly, at least every year, or whenever the pupil's needs changes.

The parents/carers, specialist nurse (where appropriate) and relevant healthcare services should hold a copy of the IHCP. Other school staff will be made aware of, and have access to the IHCP for the pupils directly in their care.

3.3.3 Administering Medications

Medication will only be administered when it would be detrimental to a pupil's health or school attendance not to do so.

The Academy will not give any medication (prescribed, or non-prescribed) to a child under 16 without a parent's written consent except in exceptional circumstances under direction of a medical professional.

Pain Relief and Cough relief mixtures

When administering pain relief or cough relief medication, the member of staff will check the maximum dosage and when a previous dose was given. Parents/carers will be informed of all doses given at school – see model letter in appendices.

The Academy will only give non-prescription medicines to pupils for a maximum of 3 days, even where parents give permission. The only exemption to this is if pain relief is required during the healing period of an injury such as a sprained joint, or broken/fractured limb.

A child under 16 years of age should never be given medicine containing Aspirin unless prescribed by a healthcare professional.

Some medicines need to be given at specific times, for example

- before, with or after food – the absence/presence of food in the stomach can affect how the medicine works and may cause unwarded effects
- some illness can only be controlled with very precise dose timings, for example, seizures may only be controlled if the medication is taken at set times

Oral Mixtures

A measuring spoon/syringe/vessel must be provided by the parent/carer, and the dose of medicine is measured using this. Instructions on the medication label must be followed. Wherever possible, the spoon/syringe/vessel should be handed to the pupil for them to administer the dose themselves. Each individual pupil's spoon/syringe/vessel should be cleaned and kept with their own medication.

Tablets/capsules

Pupils who need tablets usually take them before or after their meal according to their GP's instructions. They may however be needed at other times of the day.

Secondary School Students should go to the delegated office and ask for their tablets from the appropriate member of staff (see Training).

Inhalers

Inhalers will be kept in individual classrooms in a grab bag, unless there is a specific reason why this is not appropriate, which must be documented in the IHCP. When the pupil needs to take their inhaler, e.g. before a PE lesson, or at break time/lunchtime, the teacher/admin staff should record this on a daily record. Where a child increases the number of times they need their inhaler, staff will be alerted to this by the record, and they are able to pass this information onto the parents, so that the 'preventer' inhaler dose can be checked by their GP.

Pupils are trained how to access and use their inhaler, and the importance of adult supervision. Pupils should be supervised when they take their inhaler. If they have any difficulty, the First Aider should be called to assist.

If parents request that their child keeps their inhaler with them during the day, the pupil must be reminded by the class teacher to record when a dose has been taken

Emergency Salbutamol Inhalers

The Academy holds an emergency inhaler for use by pupils who have been diagnosed with asthma and prescribed a reliever inhaler, OR who have been prescribed a reliever inhaler.

Written parental consent for its use has been obtained, and a record of this is kept with the emergency inhalers to establish which pupils have this in place. A nominated first aider is responsible for ensuring that this register is reviewed and kept up to date. This information will also be included on the pupil's IHCP.

If there is an emergency situation whereby consent has not been received, either for a pupil with diagnosed asthma, or for a pupil with no previous history or knowledge of asthma and symptoms suggest an asthma attack is occurring, the emergency services will be called. If advised to do so

by the emergency services, the emergency inhaler will be used even where consent has not been received and full details of the advice given and dosage administered will be recorded.

An emergency kit is in place, the information about where the kit is kept is specified on a poster just outside the Admin Office. The kit includes:-

- a salbutamol metered dose inhaler
- at least two plastic spacers
- instructions on using the inhaler and spacer, together with cleaning/storage instructions

To avoid possible risk of cross-infection, the plastic spacer should not be reused. It can be given to the pupil to take home for future personal use. The inhaler can be cleaned and reused.

If a pupil has used the emergency inhaler, their parent/carer will be informed as soon as possible. This will be completed by a nominated first aider.

A “Guidance on the use of Emergency Salbutamol Inhalers in School” consent form template, to be completed by parent/carers template (see Appendices).

A “Guidance on the use of Emergency Salbutamol Inhalers in School” specimen letter to inform parents of the use of an emergency inhaler is attached - see Appendix 3.

Further information can be found in the Department of Health’s “Guidance on the user of emergency salbutamol inhalers in school – March 2015”

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/416468/emergency_inhalers_in_schools.pdf

Emergency Medication for Anaphylactic Shock

Pupils with a known allergy, for example, to wasp stings, food allergies and medications, should have an Individual Health Care Plan (IHCP), with an emergency action plan, completed by their healthcare professional.

Where an adrenaline auto injector has been prescribed, the pupil’s parent/carer should ensure that two in date adrenaline auto injectors (e.g. an Epi Pen) are kept in the school. If appropriate, the pupil may keep an auto injector on their person – refer to the section on Self-Management. If this is not appropriate, the autoinjector should be kept safely in the pupil’s classroom. The second auto injector should be kept in the medicine box/cupboard (the information about where the medicine box is kept is specified on a poster just outside the Admin office) and be available for administering if the pupil goes into anaphylactic shock.

If a pupil is going into anaphylactic shock, the emergency services will be called immediately – see Emergency Procedures 3.4.

If there is an emergency situation where a pupil has no previous history or knowledge of having an allergy but symptoms suggest anaphylactic shock is occurring, the emergency services will be called. If advised to do so by the emergency services, another pupil’s auto injector will be used even where consent has not been received and full details of the advice given and dosage administered will be recorded. The Academy should inform the emergency services that an emergency adrenaline auto-injector is in the school.

Emergency Adrenaline Auto-Injector

If there are people in school who may require an emergency auto-injector, the Academy holds an emergency Adrenalin Auto-Injector to be administered to pupils in an emergency if the pupil's own prescribed auto-injector cannot be administered correctly without delay.

Written parental consent for its use has been obtained, and a record of this is kept with the emergency injector to establish which pupils have this in place. A nominated first aider is responsible for ensuring that this register is reviewed and kept up to date. This information will also be included on the pupil's IHCP.

Injections

School staff will not give a pupil an injection unless staff have agreed and specific training to do so has been delivered. This training will be delivered by a trained healthcare professional such as the School Nurse.

The Academy adopts practices that minimise the risk to staff, pupils and others coming into contact with sharps such as needles, detailed in the trust Health and Safety Standards (Standard 6a):

- Protect all pupils and members of staff from the danger of exposure to sharps.
- Establish a procedure around the safe handling and disposal of sharps.
- Ensure all members of staff are aware of how and where to dispose of sharps correctly.
- Make members of staff aware of sharps injury and the procedure to follow in the event of an injury.

Ointments/creams

The Academy will only administer ointments/creams prescribed by healthcare professionals. All efforts should be made for the pupil's ointment/cream to be applied at home by parent/carers. If it is necessary to apply a prescribed dose during school hours, this should be recorded (see form in Appendices).

If it is a long-term prescription (i.e., more than 4 weeks), a Healthcare Plan should be provided by the pupil's healthcare professionals.

The pupil will be encouraged to apply the cream/ointment themselves, under supervision from a member of staff. Where this is not possible due to competency or location area on the body then Department for Education's Template (consent form – see Appendices) should be completed. A body map should be completed for the area where the cream/ointment is to be applied (consent form – see Appendices).

Eye, Nose and Ear Drops

The Academy will only administer ear, nose or eye drops prescribed by healthcare professionals. All efforts should be made for the pupil's ear, nose or eye drops to be applied at home by parent/carers. If it is necessary to apply a prescribed dose during school hours, this should be recorded (see form in Appendices). The drops should be administered, following the label's instructions by a member of staff. Good infection prevention practice should be adhered to, i.e. using a clean environment, with handwashing facilities immediately available.

3.3.4 Self-Management

It is good practice to support and encourage pupils, who are able, to take responsibility to manage their own medicines from a relatively early age, and the Academy will encourage pupils to manage the use of their inhalers and adrenaline auto injectors (epi pens) accordingly. The Academy acknowledges that the age at which pupils are ready to take care of and be responsible for, their own medication varies. Health professionals need to assess, with parents and pupil, the appropriate time to make this transition.

3.3.5 Refusal to Take Medicine

If a pupil refuses to take their medication, staff should not force them to do so. If a prescribed condition critical medication/injection is refused, the Academy must take prompt action by informing the parent/carer and healthcare professional as soon as possible, as outlined in their IHCP.

If a pupil refuses to take a non-prescribed medication, this should be recorded in the pupil's records. Parent/carers should be informed of the refusal on the same day.

If a refusal to take medication results in an emergency, the Academy's emergency procedures should be followed – see Section 3.4.

3.3.6 Storage

All medications must be stored safely. Pupils with medical conditions should know where they are at all times and have access to them immediately.

The Academy should provide cold storage for medications once opened, if required, as directed by prescription/written instructions from a healthcare professional.

Medications should not be stored in any first aid boxes on the premises.

The Academy should only accept prescribed (and non-prescribed) medication that is in date, labelled and in its original container including prescribing instructions for administration.

Medicine (with the exception of individual inhalers) should be stored in a named Medical Box with each pupil's medicine clearly marked with the pupil's name and the dose to be taken. A photograph of the pupil can be attached to the medication for clear identification. Facilities should be available to ensure that the medications are stored at the correct temperature if stated on the medication label/IHCP.

Parents/carers should be asked to collect all medications/equipment at the end of the school term, and to provide new and in date medication at the start of each term.

3.3.7 Record Keeping

As part of the Academy's admissions process and annual data collection exercise parents/carers are asked if their child has any medical conditions. These procedures also cover transitional arrangements between schools.

General Record Keeping

The pupil's confidentiality should be protected and the Academy should seek permission from parents/carers before sharing any medical information with any other party.

The Academy will keep an accurate record of all medication administered, including the dose, time, date and supervising staff by using Department for Education's form (see Appendices).

3.3.8 Controlled Drugs (CDs)

Some pupils may require routine, or emergency prescribed controlled drugs administering whilst at school. Controlled Drugs require additional safety controls for storage, administration and disposal, under the Misuse of Drugs Regulations 2001. The Academy should follow these to ensure that all legal requirements and best practice are adhered to.

A list of commonly encountered controlled drugs can be found at the following link:-

<https://www.gov.uk/government/publications/controlled-drugs-list--2/list-of-most-commonly-encountered-drugs-currently-controlled-under-the-misuse-of-drugs-legislation>

Guidance on how a controlled drug is classified can be found at the following link:

<https://www.gov.uk/government/publications/2010-to-2015-government-policy-drug-misuse-and-dependency/2010-to-2015-government-policy-drug-misuse-and-dependency#appendix-1-classifying-and-controlling-drugs>

An example of a medical condition that may require a controlled drug is ADHD, for which methylphenidate (Ritalin[™]) may be prescribed.

Midazolam Buccal, which is a medication used for controlling seizures, is a Schedule 3 controlled drug, and does not require the same controls as other Schedule 1 and 2 controlled drugs under the legislation. However it is best practice to store and control this medication in the same way as other controlled drugs.

A controlled drug can only be admitted on the school premises if it is recorded in the pupil's individual healthcare plan – see the Department for Education's Template: Individual Healthcare Plan (see Appendices). When a controlled drug is prescribed, and has to be administered during school hours, it should be highlighted on the template. Extra training requirements should be highlighted and undertaken for staff administering a controlled drug. Advice should be sought from healthcare professionals, or the School Nurse, together with consultation with the parent/carers.

The following requirements should be met, in line with the above legislation:-

- storage:
 - the medication should be double locked, i.e. in an appropriate storage container, in a locked room. The medication may need to be kept refrigerated once opened, and this should be made clear on the IHCP.
 - named staff only should be allowed access to the medication. A plan for obtaining the medication for a medical emergency, or school evacuation, should be put into place.

- administering:
 - two members of staff should be present when the drug is to be administered, to double check the dose is correct. One person will administer the dose, and the second person will witness its administration.

- record keeping:
 - a separate Controlled Drug register should be kept, to record each dose that is administered, and should be signed by the two members of staff who administer the medication. This register is to be kept for two years from the date of the last entry in the register.

 - if misuse of a controlled drug is suspected, all records should be checked by Senior Management and the Headteacher, and reported to the Police/Local Intelligence Network (LIN). Guidance on this should be sought from healthcare professionals.

- destroying
 - unused controlled drugs should be destroyed of under specific controlled conditions. This should be referred to on the IHCP, and advice taken from healthcare professionals.

3.3.9 Unacceptable Practice

Although school staff should use their discretion and judge each case on its merits with reference to the pupil's individual healthcare plan, the following is generally not acceptable practice.

The Academy will not:-

- prevent pupils from easily accessing their inhalers and medication and administering their medication when and where necessary
- penalise pupils for their attendance record if their absences are related to their medication condition, e.g. hospital appointments.
- require parents, or make them feel obliged, to attend school to administer medications, or provide medical support to their child.
- assume that every pupil with the same condition requires the same treatment
- ignore the views of the pupil or their parents; ignore medical evidence or opinion
- send pupils with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans
- send a pupil to the school office/medical room if they become ill unaccompanied, or with an unsuitable person
- prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- prevent pupils from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany the pupil.

If a pupil misuses their medication, or anyone else's, their parent/carer is informed as soon as possible and the Academy's disciplinary procedures are followed.

The Academy will ensure that all staff responsible for administering medications understand that they must strictly adhere to the prescription dosage, and the implications for not doing so. This will be done at the time of agreeing to undertake this role.

Staff should be aware that they must not alter/amend any medications, i.e. by crushing tablets or increasing a dose if requested by the pupil. Specific written instructions will be given by a healthcare professional if there are any changes to a dose or methods of administration.

The Academy will make it clear to staff responsible for administering medicines of the implications for covertly taking medications and that the Academy will immediately undertake disciplinary action/police investigations as needed.

3.3.10 Complaints Procedure

The Academy will ensure that any complaints concerning the support provided to pupils with medical conditions will be investigated appropriately.

Should parent/carers be dissatisfied with the support provided, they should discuss their concerns directly with the Academy. If, for whatever reason this does not resolve the issue, they may make a formal complaint via the Academy's complaints procedure.

Making a formal complaint to the Department for Education should only occur if it comes within scope of section 496/497 of the Education Act 1996, and after other attempts at resolution have been exhausted.

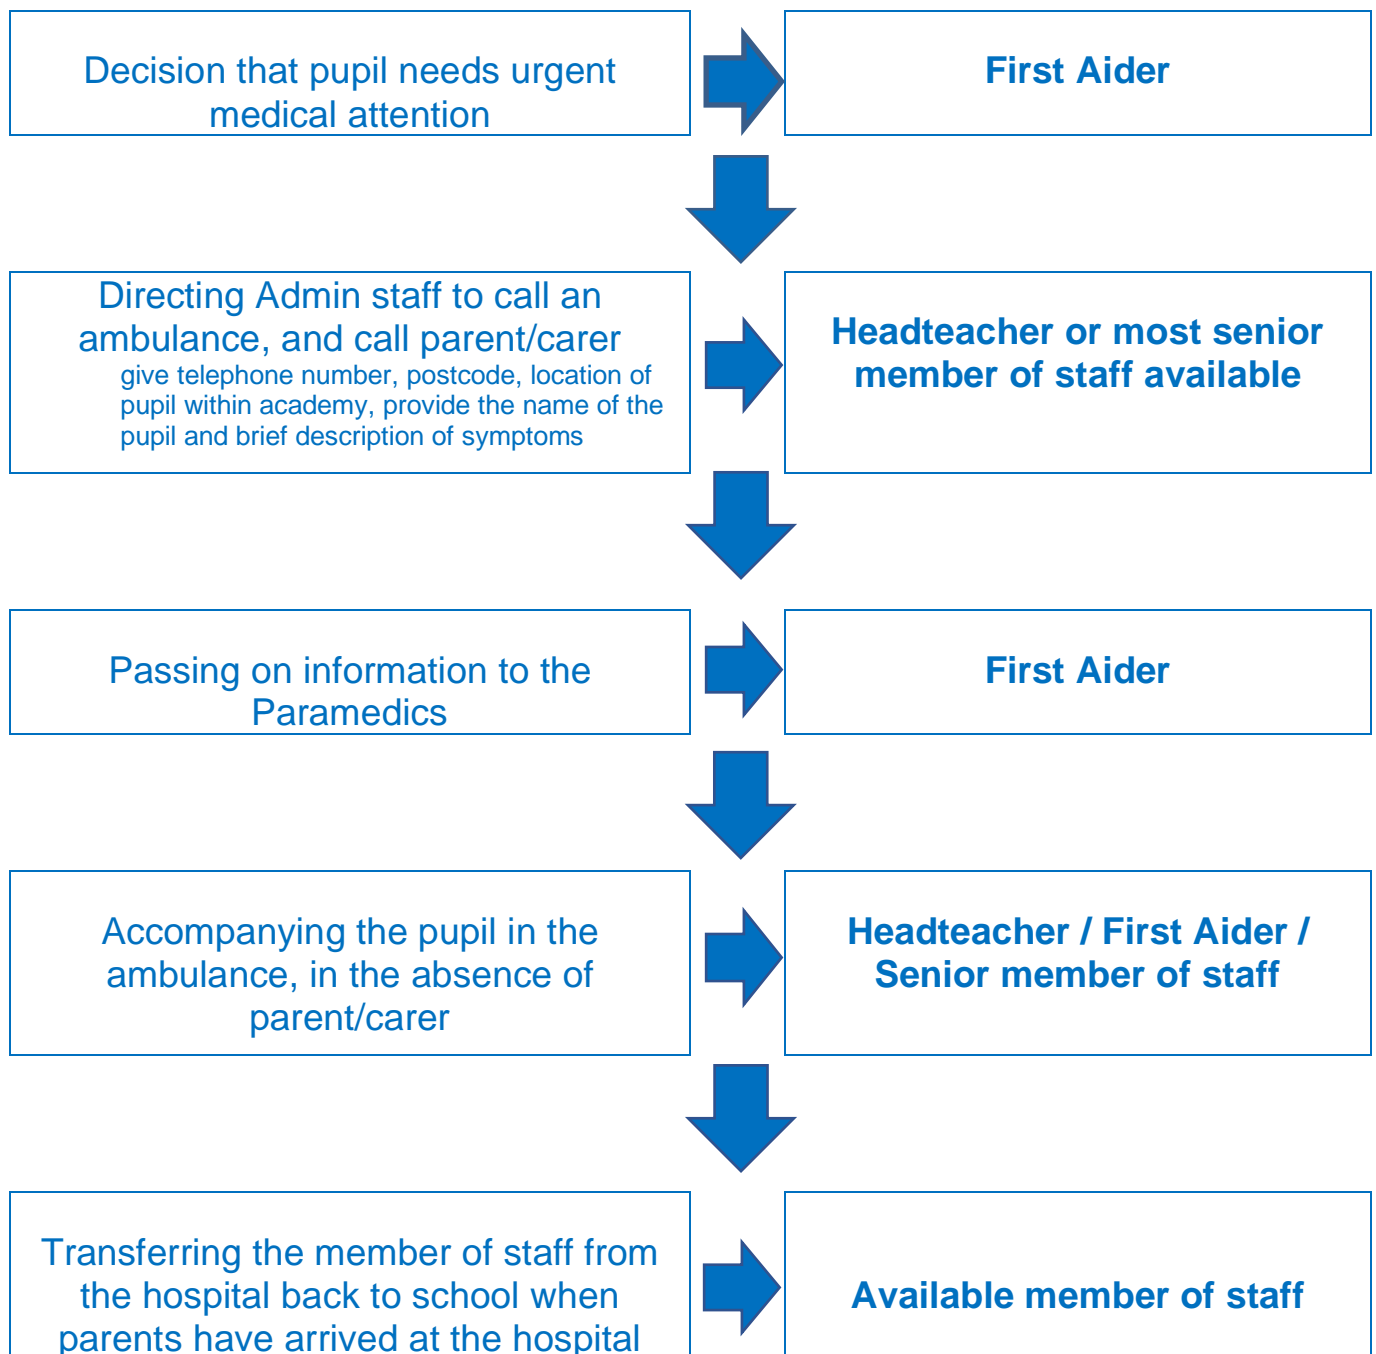

It will be relevant to consider whether the Academy has breached the terms of its Funding Agreement, or failed to comply with any other legal obligation placed on it. Ultimately, parents (and pupils) will be able to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

3.4 Emergency Procedures

The flowchart follows Template F of the Department for Education statutory guidance.

Staff should not take pupils to hospital in their own vehicle.

Where an Ambulance needs to be called in school, there are several roles which need to be fulfilled. The responsibility for these roles is fluid, to cover staff absence/cover. All staff should be aware of the procedures.

3.5 Managing Medication on an Outing/Residential Visit

Risk assessments are completed before each school trip and outing. Risks for pupils with known medical conditions are considered, as well as any potential risk to others.

Pupils who require short term medication for the duration of the trip/residential

Parent/carers complete medical forms at least three weeks before the visit at which point the Academy will establish, from parents/carers, the medication, circumstances in which it can be administered, the precise time the dose is given and the exact dose.

All medication must be provided in the original packaging as supplied from the pharmacy.

Pain Relief

Pupil's/students who require regular/prescribed pain relief that needs to be taken whilst on an outing/residential visit must bring in their own supply of the medication and parents must complete a separate medication consent form. All pupil/student medication will be held in by the Visit Leader.

In secondary schools, students who are competent to do so, may keep their own supply of medication, such as pain relief.

The Academy may take a central store of medication such as Calpol/paracetamol on a residential visit. Parental consent must still have been given for administration. This will be achieved as part of the parental consent to act in loco parentis in emergency situations. Prior to administering medication that has not been directly provided by the parent/carer, the Visit Leader will always attempt to contact the parent/carer to explain why the medication is being given.

Pupils with an Individual Healthcare Plan in place

For pupils with known medical conditions, staff will make contact with the parent/carer in advance of the trip. This will ensure that they are fully briefed to ensure that there are adequate quantities of medication available, that the pupil's condition is stable, and which emergency details are required should the pupil need to have additional support. This is documented for the Group Leader.

For Early Years/Foundation Stage pupils, where it is assessed that the pupil cannot self-manage their inhaler, Group Leaders will ensure that staff keep the inhalers for pupils allocated to them. All doses administered need to be recorded.

Controlled drugs

The Academy will make every effort to accommodate pupils with a medical condition who require controlled drugs to be administered when in the school's care, but off the school premises. For a residential visit, consultation with the venue will need to take place, to ensure safe storage facilities will be in place.

LEGISLATION:

Section 2 of the **Health and Safety at Work Act 1974** and the associated regulations, provides that it is the duty of the employer (the governing body and academy trust) to take reasonable steps to ensure that staff and pupils are not exposed to risks to their health and safety.

Misuse of Drugs Regulations 2001 and associated regulations the supply, administration, possession and storage of certain drugs are controlled. Schools may have a pupil who has been prescribed a controlled drug.

The Medicines Act 1968 specifies the way that medicines are prescribed, supplied and administered within the UK and places restrictions on dealings with medicinal products, including their administration.

Regulation 5 of the School Premises (England) Regulations 2012 (as amended) provides that maintained schools must have accommodation appropriate and readily available for use for medical examination and treatment and for the caring of sick or injured pupils. It must contain a washing facility and be reasonably near to a toilet. It must not be teaching accommodation. Paragraph 24 of the Schedule to the Education (Independent School Standards) Regulations 2014 replicates this provision for independent schools (including academy schools and alternative provision academies)

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of pupil referral units (PRUs) to make arrangements for supporting pupils at their school with medical conditions.

Appendix 2 – Specimen letter to inform parents of emergency salbutamol inhaler use

Child's name

Class

Date

Dear XXXX,

[Delete as appropriate]

This letter is to formally notify you that XXXX has had problems with his / her breathing today. This happened when XXXXXX

A member of staff helped them to use their asthma inhaler.

They did not have their own asthma inhaler with them, so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given XXXX puffs.

Their own asthma inhaler was not working, so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given XXXX puffs.

[Delete as appropriate]

Although they soon felt better, we would strongly advise that you have your seen by your own doctor as soon as possible.

Yours sincerely,

Appendix 3 - Model Letter Inviting Parents to Contribute to Individual Healthcare Plan Development

Dear Parent

DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the Academy's policy for supporting pupils at Academy with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the Academy, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in Academy life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely

Appendix 4 – Forms

All of the following forms can be downloaded from the Information Hub/Forms, Policies and Templates/Central Forms/Health and Safety

Consent Form – Use of Emergency Salbutamol Inhaler

Consent Form – Use of Emergency Adrenaline Auto Injector

Consent Form – Administer Medicine

Consent Form – Application of Creams and Ointments

Educational Visits Consent Form

Poster – Location of Medical Box etc

Record of Medicine Administered to an Individual Child

Record of Medicine Administered to All Children

Staff Training Record – Administration of Medicines

Appendix 5 – Templates

All of the following templates can be downloaded from the Information Hub/Forms, Policies and Templates/Templates/Health and Safety

Individual HealthCare Plan Template
